EXECUTIVE SUMMARY

Data Scientist with 5+ years at TikTok/ByteDance in experimentation infrastructure, product analytics, and AI-driven analytics tooling.

- **Product Analysis:** Applied statistical learning methods to identify a three-tier key-driver framework for PDP (Product Detail Page) conversion, guiding page structure optimization across TikTok Shop. Conducted deep dive analysis and drove 20+ feature launches with north-star metric gains.
- **A/B Experimentation:** Designed and launched 30+ features for TikTok Global E-Commerce's A/B experimentation standardization—covering launch, monitoring, and abnormal-experiment detection, including framework design for complex experiments (Holdout/Rotation). Now adopted org-wide, catching 200+ GMV-negative experiments per quarter. Built an LLM-based summary tool that cut data science reporting time from days to hours.
- **AI Infrastructure:** Prototyped an LLM-based knowledge base, establishing a maintainable foundation for a variety of team-wise agent applications.

WORK EXPERIENCE

TikTok | Global E-Commerce | Full-time

Data Scientist, Core User Experience | Recognized as TikTok Shop Value Creation Star *Dec.2023-June.2026*

Product Analysis & Statistical Modelling

- *Machine Learning-Based PDP Conversion Key Factors Analysis:* Applied machine learning classification methods to evaluate the importance of product features on PDP *(Product Detail Page),* identifying three-tier key product elements that best enhance conversion.
- *PDP Optimization Roadmap:* Translated statistical findings into a page-structure optimization roadmap for PDP. Drove prioritization, shipping, and evaluation of 20+ feature launches with product and design teams, delivering measurable north-star metric C-O *(Click-to-Order rate)* gains.
- *PDP Event Tracking Standardization:* Defined a unified event-tracking standard for PDP and recommendation modules and drove data, product, and engineering alignment on metric definitions, enabling reliable module-level measurement and eliminating recurring metric disputes.

Experiment Platform & Governance

- *Experiment Life-Cycle Standardization:* Designed and launched 30+ features for an end-to-end experiment governance system covering attribution, monitoring, and rollout rules globally; Quarterly shut down 200+ abnormal experiments, saving $10M+ in GMV loss.
- *Container Experiment Framework Construction:* Designed container experiments as the standard method to measure combined feature effects across user product team—widely adopted by Data Scientist teams across TikTok Shop.
- *Proxy Metrics Discovery:* Applied meta-analysis across batch experiments to identify sensitive proxy metrics, enabling faster, reliable read-outs when north-star metrics lacked statistical power.

AI-Driven Analytics Infrastructure

- *LLM-based Experiment Summary:* Built an LLM-based pipeline to synthesize experiment results, cutting Data Scientist reporting time from days to hours and becoming a widely adopted tool across the business department.
- *LLM-Based Knowledge Base Construction:* Prototyped an LLM knowledge base for the user product data science team, constructing a structured, cross-linked Markdown notes that an LLM organizes and reasons over, using Obsidian and the internal Claude platform, establishing a maintainable, team-based knowledge foundation.

ByteDance | TouTiao *(ByteDance's flagship news feed app in China)* | Full-time
Data Scientist, Video & Livestream Recommendation Platform *Feb.2022-Dec.2023*

- *Content Filtering & Targeted Distribution:* Built a city-level user preference labeling system for 20+ key cities using TGI (Target Group Index) analysis of demographic preferences and productized the "labeling → filtering → targeted distribution" pipeline as a standard workflow, lifting VV (video views) by 1%+.
- *Anomaly Early-Warning System:* Designed an early-warning system for abnormal metric fluctuations with root-cause attribution, enabling the after-sales team to proactively identify and re-engage high-risk customers before churn.

ByteDance | Lark *(ByteDance's enterprise collaboration and productivity suite)* | Full-time
Data Scientist, OKR Product *Dec.2020-Jan.2022*

- *"@" Feature Impact Analysis:* Demonstrated that team leaders using the "@" function achieved significantly higher OKR alignment, driving a feature launch that became a core product component.
- *Free-to-Paid Customer Growth*: Identified 200+ high-potential free customers and co-designed a follow-up process with the marketing team, achieving a top-2 conversion rate across all channels and driving closed-won deals.

SKILLS

- **Data Science Skills:** SQL (Hive), Python, A/B experiment design & governance, statistical analysis & modeling, machine learning, causal inference
- **Product Analytics Skills:** Metric design & event tracking, funnel & conversion analysis, north-star metric definition
- **Other Technical Skills:** LLM application development (Claude API), AI-assisted workflow construction

EDUCATION

University of Washington ***Seattle, WA***
Master of Science in Information System Management, Foster School of Business *June.2027 (Expected)*
University of Delaware ***Newark, DE***
Bachelor of Science in Statistics & Finance, Minor in Economics *Jan.2020*
GPA: 3.73/4.0; Major GPA: 3.80/4.0
Southwestern University of Finance and Economics (SWUFE) ***Chengdu, Sichuan, China***
Bachelor of Science in Economic Statistics *Jun.2019*
GPA: *87/100;* **Class Rank:** *16/105*

HONORS, AWARDS & INTERESTS

Professional Recognition: Value Creation Star, TikTok Global E-Commerce Data Science (2025)

Academic Performance: Class of 2020 with Cum Laude • Dean's List all semesters

Research Project: *Transfer Learning Application in Customer Lending Scenario* as outstanding undergraduate thesis

Beyond Work: Chinese National Level 2 Swimmer • Principal Pipa Player, SWUFE Orchestra • Yoga practitioner
